

Lyes Ramdane

Fullstack Developer

Saint-Ouen-sur-Seine, France | +33 6 65 11 26 04 | ramdanelyes96@gmail.com | www.lyesr.dev

Fullstack developer with 5 years of experience in designing and developing web applications. Specialized in optimization, security, and delivering robust solutions for international clients. Autonomous, result-oriented, and accustomed to multicultural environments.

Professional Experience

- **Les Revues du Monde – Fullstack Developer** *Paris, France / Aug. 2025 – Oct. 2025*
 - Development of an interactive web application for embedding visualization, integrating a polling system and a full analytical dashboard.
 - Designed and implemented an interactive poll with multi-vote detection, used by more than 30,000 users and generating over 60,000 unique responses.
 - Created an advanced analytics dashboard with enriched visualizations and real-time metrics.
 - Full deployment of the application on AWS: EC2 Ubuntu server configuration, Node.js environment setup, Nginx reverse proxy, Let's Encrypt SSL, and update pipeline.
 - Stack: React, TypeScript, D3.js, Express, SQLite, Jest
- **Fullstack Developer** *Paris, France / Jan. 2025 – Jun. 2025*
 - Development of backend services and WebSockets for real-time telemetry retrieval and processing.
 - Design and implementation of various HMI interfaces.
 - Management and reduction of technical debt across several key modules.
 - Implementation of tests and continuous integration to improve product reliability.
 - Participation in requirement definition and drafting of technical specifications.
 - Stack: React, TypeScript, NestJS, Jest
- **Accenture DACH – Front-End Developer** *Lugano, Switzerland / Apr. 2022 – Aug. 2024*
 - Creation of reusable React components for an international e-commerce platform (consistent UI, -20% development time)
 - Implementation of unit tests (Jest), raising code coverage from 60% to 90%
 - Front-end performance optimization (-30% loading time)
 - Front-end security (XSS, CSRF), GDPR compliance
 - Technologies: Typescript, React, Redux, Jest
- **Update Fitness AG – Fullstack Developer** *Münchwilen, Switzerland / Oct. 2020 – Mar. 2022*
 - Design & development of an internal ERP (client centralization, automation, -40% manual tasks)
 - Development of a real-time monitoring tool (WebSocket) for room occupancy management
 - Lead developer on a mobile app for coaches (planning, client tracking)
 - Integration of analytics and reporting tools
 - Technologies: NestJS, Jquery, Jquery Mobile, Dhtmx

Technical Skills

- **Tech stack:** JavaScript, TypeScript, PHP, Python, SQL — React, Vue, Node.js, NestJS, Symfony, Flask — Docker, GitHub Actions, Bitbucket
- **Tools:** MySQL, PostgreSQL, MongoDB — Jest — AEM, WebSocket, RxJS

Education

- 2019: Fullstack Web Developer Certification – Web Force 3, Normandy
- 2018: BTS Computer Network Maintenance – CFPA, Algiers

Languages

- French (native), English (fluent), German (basic)
